**MASK WITH THE EYE HOLES BEING SHAPED LIKE AN UPSIDE T,
AND IT LOOKING SIMILAR TO A CLASSIC KNIGHT'S HELMET**

**2 MEN ARGUING THEY HAVE BAD ORAL HYGIENE AND BAD
OPINIONS THEY'VE HAD A HARD LIFE**

MASK WITH EYE HOLES LOOKING AT ME

The majority of people taking the survey responded with a neutral connotation. Meaning they didn't feel a strong feeling when first observing the imagery. Whereas the people who recorded their responses as positive or negative did experience.

The initial question was to choice if you are artistic, somewhat, or not artistic. The results from this showed that majority of people claim to be artistic. During the study there were not many connections that made a difference in this category.

From the data collected I was able to find patterns among the responses. The most popular trend was kissing whether that was humans or animals. Body parts such as ribs, and uterus' followed the kissing. The last trend I noticed was masked figures.

did your perception change?

Take time to reflect on your original thoughts compared to viewing other ideas of the same thing. Stay open to other perceptions and interpretations- Finding patterns in human descriptions is normal but even through the similarities there are differences.
